

Sustainability change
is in your hands.

Change management starts with the ecoBoss™ app

ecoBoss is an employee engagement platform that educates and mobilizes your community through hands-on sustainability challenges. It encourages participants to record daily actions and earn points while competing for custom prizes. It's these every day actions that become habits, producing measurable change for your organization's sustainability goals.

Community
engagement

Powerful
data collection

Make
change fun

Customizable content.

- Create challenges that best align with your organization's sustainability goals.
- Customize the look and feel with your logo and visuals for seamless brand integration.
- Inspire users with unique prizing packages created by you.
- Edit actions depending on your sustainability needs.

blackPAC™ and ecoBoss working in sync.

When a Distributed Energy Resource Management System works seamlessly with a change management driver, things are more likely to change. This duo works harder than any other platform on the market to help manage your energy consumption and GHG emissions.

Engage your community to make lasting change.

Participants' actions are projected in real-time on a blackPAC public dashboard in a common area of your facility. These dynamic dashboards provide recognition for participants, show environmental impact and can be customized to suit your organization's sustainability goals.

59,104 kg in
CO2 savings

3,871 kg of
waste diverted

491,435 L of
water saved

Be the change your community needs.
